

Defying Boundaries by Design™

**Not All Network Security is Created Equal**

## Cyber Security Solutions Tailored for Satellite Communications

Ensuring the safety and productivity of your remote operations means protecting your communications network from the ever-increasing threat of a cyber attack. Satellite-based networks employ sophisticated technologies that require specific cyber security and information assurance expertise. With over 25 years of field proven experience developing satellite networks for high-security environments, you can depend on DataPath for a customized network security solution that ensures both mission success and peace-of-mind.

- Network Certification & Accreditation
- Global 24/7 Incident Response
- Managed Security Services
- Vulnerability Assessment
- Security Plan Implementation Support

# Cyber Security Packages

Security Hotline & 24 x 7 Incident Response		Optional	✓
Post Incident Investigation			✓

## Why Do You Need Cyber Security?

- > 94% of all organizations have experienced a security event in the last 12 months

*(IT Risks Survey, Kaspersky Labs/B2B International, 2014)*

- > Reported cyber security incidents grew 48% in 2014

*(The Global State of Information Security Survey 2015, CIO, CSO and PWC, 2014)*

- > Over 300K new strains of malware are identified each day

*(Kaspersky Security Bulletin 2013, Kaspersky Labs)*

- > Average data breach cost is \$5.85 million in remediation costs, lost revenue and brand/reputation damage

*(2014 Cost of Data Breach Study: Global Analysis, Ponemon Institute, 2014)*

## Package Overview

### ESSENTIAL

DataPath's Essential Cyber Security package provides state-of-the-art tools and best practices to thoroughly assess your network infrastructure and identify vulnerabilities. We then create a customized security plan to help you identify and manage security threats before they turn into costly and mission-impacting incidents in the field or at your customer's locations

### ASSURANCE

The Assurance package gives you all of the benefits of the Essential package, with the addition of security plan implementation and remediation support to give you peace of mind in knowing that the appropriate security measures have been addressed to protect your network from cyber attack. The plan also gives you the option of having ongoing certification support and incident response.

### VIGILANCE

With the Vigilance package, you can rest assured that your network is safe and secure. This package provides all of the benefits available in our complete Cyber Security Solution. We will be your partner in securing your network and then providing ongoing support, monitoring, planning and incident response.
